## Virginia Transformer Corporation

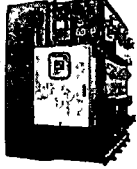

Virginia Transformer is a leading manufacturer of custom engineered power electric transformers for energy, industrial, mining, oil & gas, utility, commercial, institutional, specialty and export markets in power ranges from 300 kVA to 100 MVA. Virginia Transformer produces one of the broadest ranges of small and medium power transformers available from a single source.

### Your One Source for POWER...

Please take a short tour of our newest Factory: Georgia Transformer - the Premier Large Power Transformer Manufacturer in the USA. With a 24,000MVA annual capacity the 250,000SqFt facility employs over 150 highly experienced people who use the latest technology, tools and equipment to design, manufacture, test and deliver reliable, high quality LPT starting at 30MVA 115kV up to 400MVA 345kV Core type and up to 1400MVA 500kV Shell form to Utilities and Industrial customers in North and Central America.
